

The Wireless Source

ISO 14001 Environmental Statement

The Wireless Source provides innovative and practical environmental solutions for mobile phone recycling that create economic value for our customers.

We are committed to preventing pollution, in particular e-waste, by promoting the recycling of used cellular handsets and equipment. We are also committed to helping improve the environment by reducing our own environmental footprint.

We will comply with all relevant federal, state and local legislation and other requirements, as well as, actively assist our clients with their compliance requirements.

In addition, The Wireless Source employees will strive to continuously improve our efforts to create a cleaner and safer environment.
